

Spring Creek Model Railroad Club

The **Spring Creek Model Railroad Club (SCMRC)** is the place for you if you're interested in model railroading. Our club was founded in 1986 and has developed into one of the Greater Dallas Areas most unique HO sectional train layouts. Sectional modeling is defined as a model train layout made up of a number of individual sections (tables) that are assembled together to form a single layout.

The **SCMRC** layout features both HO standard gauge and HO_n3 narrow gauge trackage. We model many eras from the 1880's to the present and operate steam and diesel, freight and passenger trains.

The layout runs on a Digitrax **Digital Command Control (DCC)** system. It's the latest in model railroad operating technology. Trains are controlled using wireless walk-around throttles.

SCMRC has six to eight weekend shows a year at venues in the Greater Dallas Area. Among these are two shows a year at the Plano Events Center and multiple shows at various Plano Libraries.

SCMRC meets monthly at different members' homes to take care of club business and to share our interest in model railroading. We occasionally take field trips to ride tourist trains, attend train shows, visit museums or visit railroad equipment manufacturers.

WANT TO BE A MEMBER OF SCMRC?

We are looking for serious members who have a high level of model railroading interest and want to learn about modeling and have fun. Membership can include being a "Caretaker" of a module or simply being an active member participating in club functions that include setup and takedown of the layout at shows, attendance of monthly meetings and running trains.

For more information and to see our Calender of Events, visit our website: www.springcreekrailroad.com. For additional information about **Club Membership** or for additional inquiries, please contact:
